

Neither this document nor any part of it should be disclosed to any third party without the prior written consent of Astun Technology Limited. You acknowledge that this document has been provided in reliance upon it being subject to the exemption to disclose. If you disagree that this exemption applies then please return the information and expunge all records of it from your systems, unless we agree to waive this requirement.

1. In the workflow create a new Spatial Data Transformation task
2. select the PG Data Share connection as your source with the AstunLocationLookup table
3. specify your output as MapInfo Tab, Shape etc
4. Check the Expert Mode and paste in the following

```
-sql "SELECT AsBinary(wkb_geometry) as wkb_geometry,\"Name\", \"Postcode\", \"UniqueId\", \"Paren
```

This will stop all the unnecessary column index being exported.
