## How do I add a simple URL?

Steps	Results
<p>You may simply wish to add a link to a specific website to your My House page e.g. Information about Public Halls for hire.</p> <p>In this example you would add a Virtual layer to the layer group say for <b>Community Centres</b> and then in the <b>Row Settings</b> at the bottom select the green + and add the information that you wished to be displayed including any html.</p>	
<p>Here are the results of adding the above information.</p>	
<p><b>Using advanced internal tags</b></p> <p>You can add a number of rows which may use the following variable fields.</p> <p><b>##postcode##</b></p> <p><b>##eastng##</b></p> <p><b>##northing##</b></p>	
<p>Here is an example of the output using the above row information.</p> <p>The <b>##postcode##</b> variable has been used for the links and the <b>##eastng##</b> and <b>##northing##</b> for retrieving the map image.</p>
